Trainer is a great trainer I think I am just in the bottom 10% of the class. I completed a java/servlet/jsp project before coming back to training. I enjoyed the project and enjoyed Great Tutor! very Knowledgeable. Sample Examples don't compile or work well. to practice use as examples

1/22/2020 9:56:11 Week 2	4	
1/22/2020 9:56:15 Week 2	3	The content is good when the trainer is around. The pace is fast, and if we are to do the training as expected it would be better to have him with us instead of in so many meetings or providing Trainer was often away in meetings and not available to assist trainees in the classroom.
1/22/2020 9:56:44 Week 2	2	When he was in the classroom, the lectures were informative but the revaturepro quiz also Would prefer that our trainer not get called away so much for emergency client meetings and whatnot, but I understand that is the nature of the business. 1/22/2020 10:29:06 Week 2	5	I feel like the training could benefit from a more structured daily timeline and curriculum as opposed to an overall general curriculum and timeline
1/22/2020 11:09:41 Week 1	2	While demonstrating, the instructor should indicate where they are navigating to before doing so. They tend to go faster than many people can follow and this would slow them
1/22/2020 11:24:13 Week 1	4	I am personally having a tremendous problem understanding the accent of the instructor. The instructor is also talking too fast and does not elaborate. The more questions I ask the faster
1/22/2020 11:31:08 Week 1	1	Lectures are good, but maybe less time on meetings?
1/22/2020 12:34:06 Week 2	3	Week three with the day off and QC project review meant this week we only had three days to review material.
1/23/2020 10:30:26 Week 2	3	Other than above, class is shaping up nicely; we are learning to educate ourselves from stubs introduced in class.

1/24/2020 9:13:16 Week B	4	Its a tough balance to go fast enough through material for us to be able to use it in our projects and also go slow enough for us to internalize the concepts. I believe Matt is doing Trainer is awesome! I am glad to have him as my instructor.
1/24/2020 9:15:49 Week B	4	
1/24/2020 9:18:38 Week B	2	Trainer is really great and trying his best. 1/24/2020 11:45:38 Week 1	3	The teacher showed how to do things very quickly; if you missed something, you would be left behind. I think watching a video/doing a trailhead would have been much more useful
1/24/2020 11:53:11 Week 2	3	When learning a new technology, errors are prone to happen. When learning a specific software, shortcuts, formatting, and nuance add additional time required to become competent
1/24/2020 11:55:12 Week 1	3	In the first week having more dialogue between trainers and students about how the testing is done would make the process smoother moving forward. This however is not a factor
1/24/2020 11:55:53 Week 1	4	

1/24/2020 11:57:28 Week 2	4	Much better, especially when it comes to the Coding Part. The pace was good, the opportunity to practice briefly after being introduced to a concept was useful

1/24/2020 15:17:09 Week 3	5	We were allowed to have only 5 mins to present our 2 weeks of hard work. Time management is important but 5 mins was bit short time.
1/24/2020 15:56:55 Week 3	4	I feel I am doing well with training and QC. I have no problems with anyone or any processes during my training.
1/24/2020 16:06:37 Week 3	5	It did feel like we didn't progress very much because of the presentations being pushed to Thursday. It also seems as if the organization is going back on the expectations that were laid QC needs to be on same page about presentation length. Previous understanding was up to 10 minutes.
1/24/2020 16:10:36 Week 3	5

1/24/2020 17:48:23 Week 2	3	Trainer showed up late most days, averaging after 11AM without us knowing how late she would be before work started at 9. Since we didn't know ahead of time what to expect in the trainer was a little bit too fast. But he has slowed down now

There was almost no training last week and due that, it was insanely difficult to understand all the material we are required to know. We had maybe 1 full day of training with partial training on 2 days. The first project requires a strong analysis to determine object and data due to it uses text file instead of DBMS but there is not any instruction.

Also, the time is limited for this project when I've worked myself sick. Literally. I spent 30 hours over three days working on my assignment.

I had to go to the Emergency Room last night from stress overload. I came here with no coding. I was sick during the last week, and so I did miss some understanding on subjects which was no fault on the class itself.

Please summarize any relevant comments from the survey

Please yourself because you cannot please everybody. Don't be ashamed when them news mongers call your name. Stay onto the horse like a king they ar

e going to talk but you are still riding.
